## Holland Harbor – Holland Township Site CDF

### **Project Features**

- The Holland Harbor - Holland Township Site is an upland facility in Holland, MI. The CDF is located north of the Black River at the intersection of Lakewood Avenue and 120<sup>th</sup> Avenue.
- Navigation Project Served: Holland Harbor
- The CDF was constructed in 1996 as part of a dredging contract and has more than ten years of capacity remaining thanks to the local community who has been and will continue to use dredged material as a renewable resource.
- The Holland Township Site has an area of 50 acres, has a total capacity of 400,000 cubic yards, and receives about 30,000 cubic yards annually.
- The CDF is owned by the City of Holland and is operated by the US Army Corps of Engineers.

### **Beneficial Use Information**

- The material in this site has a mixed grain size.
- Direct transportation access to the CDF is available via road in addition to possible transportation access by rail within one mile of the site.
- The US Army Corps of Engineers has the authority to remove or sell material from this CDF. Interested parties can contact Mr. Thomas O'Bryan at [Thomas.W.O'Bryan@usace.army.mil](mailto:Thomas.W.O'Bryan@usace.army.mil).

### **Post Closure Use**

- The post closure use of the Holland Harbor - Holland Township Site is undermined at this time.
